

DIABETES MANAGEMENT POLICY

Diabetes in children can be a diagnosis that has a significant impact on families and children. It is imperative that educators and staff within the Service understand the responsibilities of diabetes management to reduce the risk of emergency situations and long-term complications. Most children will require additional support from the Service and educators to manage their diabetes whilst in attendance.

NATIONAL QUALITY STANDARD (NQS)

QUALITY AREA 2: CHILDREN'S HEALTH AND SAFETY		
2.1	Health	Each child's health and physical activity is supported and promoted.
2.1.2	Health practices and procedures	Effective illness and injury management and hygiene practices are promoted and implemented.
2.2	Safety	Each child is protected.
2.2.1	Supervision	At all times, reasonable precautions and adequate supervision ensure children are protected from harm and hazard.

EDUCATION AND CARE SERVICES NATIONAL REGULATIONS	
12	Meaning of a serious incident
86	Notification to parents of incident, injury, trauma and illness
87	Incident, injury, trauma and illness record

PURPOSE

The *Education and Care Services National Regulations* requires approved providers to ensure their services have policies and procedures in place for medical conditions including diabetes. Our Service is committed to providing a safe and healthy environment that is inclusive for all children, staff, visitors, and family members. The aim of this policy is to minimise the risk of a diabetic medical emergency occurring for any child whilst at our Service by supporting young people with diabetes, working in partnership with families and health professionals, and following the child's medical management plan.

SCOPE

This policy applies to children, families, staff, management, the approved provider, nominated supervisor, students and visitors of the Service.

DUTY OF CARE

Our Service has a legal responsibility to take reasonable steps to ensure that the health needs of all children enrolled in the service are met. This includes our responsibility to provide

- a. a safe environment and
- b. adequate supervision at all times.

Our Service will ensure that staff members, including relief staff, have adequate training and knowledge about diabetes and know what to do in an emergency to ensure the health and safety of children (especially regarding hypoglycaemia). Management will ensure all staff are aware of children's medical management plans and risk management plans.

DESCRIPTION

- **Type-1 Diabetes** is an autoimmune condition which occurs when the immune system damages the insulin producing cells in the pancreas. This condition is treated with insulin replacement via injections or a continuous infusion of insulin via a pump. Without insulin treatment, type-1 diabetes is life threatening.

- **Type-2 Diabetes** occurs when either insulin is not working effectively (insulin resistance) or the pancreas does not produce sufficient insulin (or a combination of both). Type-2 diabetes accounts for between 85 and 90 per cent of all cases of diabetes and usually develops in adults over the age of 45 years but is increasingly occurring at a younger age. Type-2 diabetes is unlikely to be seen in children under the age of 4 years old.

IMPLEMENTATION

We will involve all educators, families and children in regular discussions about medical conditions and general health and wellbeing throughout our curriculum. The Service will adhere to privacy and confidentiality procedures when dealing with individual health needs, including having families provide written permission to display the child's medical management plan in prominent positions within the Service if required.

Our Medical Conditions Policy and Diabetes Management Policy will be viewed by all educators, volunteers, and families of the Service. It is important that communication is open between families and educators so that management of diabetes is effective.

Children diagnosed with diabetes will not be enrolled into the Service until the child's medical management plan is completed and signed by their medical practitioner or diabetes team and the relevant staff members have been trained on how to manage the individual child's diabetes. A risk

minimisation and communication plan must be developed with parents/guardians to ensure risks are minimised and strategies developed for minimising any risk to the child.

It is imperative that all educators and volunteers at the Service follow a child's medical management plan in the event of an incident related to a child's specific health care needs, allergies, or medical conditions.

MANAGEMENT / NOMINATED SUPERVISOR/ WILL ENSURE THAT:

- before the child's enrolment commences, the family will meet with the Service and its educators to begin the communication process for managing the child's medical condition in accordance with the registered medical practitioner or health professional's instructions
- parents/guardians of an enrolled child who is diagnosed with diabetes are provided with a copy of the *Diabetes Management Policy*.
- each child with type-1 diabetes has a current individual diabetes medical management plan prepared by the child's diabetes medical specialist team, at or prior to enrolment
- a child's diabetes medical management plan is signed by a registered medical practitioner or Paediatrician and inserted into the enrolment record for each child. This will include all information on how to manage the child's diabetes on a day-to-day basis as well as the emergency management of the child's medical condition. Information may include:
 - blood glucose testing- BG meter
 - insulin administration
 - food, carbohydrate counting
 - how to store insulin correctly
 - how the insulin is delivered to the child- as an injection or via an insulin pump/
Continuous Glucose Monitoring CGM
 - oral medicine the child may be prescribed
 - managing diabetes during physical activities and excursions
- a Risk Minimisation Plan is developed in collaboration with parents/guardians and covers the child's known triggers and where relevant other common triggers which may lead to a diabetic emergency
- a Communication Plan is developed in collaboration with staff and parents/guardians encouraging ongoing communication regarding the management of the child's medical condition, the status of the child's medical condition, and this policy and its implementation within the Service prior to the child starting at the Service
- all staff members including volunteers will view a copy of the *Diabetes Management Policy* and the *Medical Conditions Policy* which are reviewed regularly

- a copy of this policy is reviewed during each new staff member's induction process (within 3 months)
- all staff members have completed first aid training approved by ACECQA at least every 3 years and that this is recorded, with a copy of each staff members' certificate held on the Service's premises
- when a child diagnosed with diabetes is enrolled, all staff attend regular professional training on the management of diabetes and, where appropriate, emergency management of diabetes
- at least one staff member who has completed accredited training in *emergency diabetes first aid* is always present in the Service whenever a child with diabetes is in attendance at the Service
- there is a staff member who is appropriately trained to perform finger-prick blood glucose or urinalysis monitoring and is aware of the action to be taken if these are abnormal whenever the child attends the Service
- consideration is given as to how and where insulin is stored and the safety of sharps disposal
- the family supplies all necessary glucose monitoring and management equipment, and any prescribed medications prior to the child's enrolment
- all staff members are trained to identify children displaying the symptoms of a diabetic emergency and are aware of the location of the diabetic medical management plan, required insulin/food, as well as the risk minimisation plan
- all staff, including casual and relief staff, are aware of children diagnosed with diabetes attending the Service, their individual symptoms of low blood sugar levels, and the location of their medical management plans and risk minimisation and communication plans
- individual children's medical management/action plans are displayed in key locations throughout the Service
- a staff member accompanying children outside the Service to attend excursions, or any other event, carries the appropriate monitoring equipment, any prescribed medication and a copy of the diabetes medical management plan for children diagnosed with diabetes
- the programs delivered at the Service are inclusive of children diagnosed with diabetes and that children with diabetes can participate in activities safely and to their full potential
- all staff and volunteers at the Service are aware of the strategies to be implemented for the management of diabetes at the Service in conjunction with each child's diabetes medical management plan
- updated information, resources and support is regularly given to families for managing childhood diabetes
- meals, snacks and drinks that are appropriate for the child and are in accordance with the child's diabetes medical management plan are available at the Service at all times
- eating times are flexible and children are provided with enough time to eat

- Diabetes Australia is contacted for further information to assist educators to gain and maintain a comprehensive understanding about managing and treating diabetes
- applications for additional funding opportunities are made if required to support the child and educators.

EDUCATORS WILL:

- read and comply with the *Diabetes Management Policy*, *Medical Conditions Policy* and *Administration of Medication Policy*
- know which child/ren are diagnosed with diabetes, and the location of their monitoring equipment, diabetes medical management plans and risk management plans and any prescribed medications
- perform finger-prick blood glucose or urinalysis monitoring as required and will act by following the child's diabetes medical management plan if these are abnormal
- communicate with parents/guardians regarding the management of their child's medical condition as per their communication plan
- ensure that children diagnosed with diabetes are not discriminated against in any way and are able to participate fully in all programs and activities at the Service
- follow the strategies developed for the management of diabetes at the Service
- ensure a copy of the child's diabetes medical management plan is visible and known to staff within the Service
- take all personal medical management/action plans, monitoring equipment, medication records, and any prescribed medication on excursions and other events outside the Service
- recognise the symptoms of a diabetic emergency and treat appropriately by following the Diabetes medical management/action plan
- ensure a suitably trained and qualified educator will administer prescribed medication if needed according to the medical management/action plan and in accordance with the Service's *Administration of Medication Policy*
- record any medication in the *Administration of Medication Record*
- identify and where possible minimise possible triggers as outlined in the child's medical management plan and risk minimisation plan
- increase supervision of a child diagnosed with diabetes on special occasions such as excursions, incursions, parties and family days, as well as during periods of high-energy activities
- ensure appropriate supplies of insulin administration equipment, carbohydrate and hypo food are taken on excursions, including back-up supplies in the event of delays

- maintain a record of the expiry date of the prescribed medication relating to the medical condition to ensure it is replaced prior to expiry
- ensure the location is known of glucose foods or sweetened drinks to treat hypoglycaemia (low blood glucose), e.g. glucose tablets, glucose jellybeans, etc.

FAMILIES WILL ENSURE THEY PROVIDE THE SERVICE WITH:

- details of the child's health condition, treatment, medications, and known triggers
- their doctor's name, address and phone number, and a phone number for an authorised nominee and/or emergency contact person in case of an emergency
- a medical management plan following enrolment and **prior** to the child starting at the Service. The plan must be completed by their child's diabetes team (paediatrician or endocrinologist, general practitioner and diabetes educator). The plan should include:
 - when, how, and how often the child is to have finger-prick or urinalysis glucose or ketone monitoring
 - what meals and snacks are required including food types/groups, amount and timing
 - what activities and exercise the child can or cannot do
 - whether the child can go on excursions and what provisions are required
 - what symptoms and signs to look for that might indicate hypoglycaemia (low blood glucose) or hyperglycaemia (high blood glucose)
 - what action to take in the case of an emergency
 - an up-to-date photograph of the child
- the appropriate monitoring equipment needed according to the diabetes medical management plan
- an adequate supply of emergency insulin for the child at all times according to the medical management plan
- any changes to their child's medical condition including the provision of a new diabetes medical management plan to reflect these changes as needed
- all relevant information and concerns to staff, for example, any matter relating to the health of the child that may impact on the management of their diabetes.

DIABETIC EMERGENCY

A diabetic emergency may result from too much or too little insulin in the blood. There are two types of diabetic emergency

- a) very **low** blood sugar- **HYP**O- (hypoglycaemia, usually due to excessive insulin), and
- b) very **high** blood sugar- **HYP**ER- (hyperglycaemia, due to insufficient insulin).

The more common emergency is hypoglycaemia. This can result from:

- too much insulin or other medication
- not having eaten enough carbohydrate or other correct food
- a meal or snack has been delayed or missed
- unaccustomed or unplanned physical exercise or
- the young person has been more stressed or excited than usual

SIGNS and SYMPTOMS

HYPOGLYCAEMIA- (HYPO)

If a child is wearing a CGM device, it will sound an alert when they are below their target range.

Symptoms can vary between each young person.

If caused by low blood sugar, the child may:

- feel dizzy, weak, tremble and feel hungry
- look pale and have a rapid pulse (palpitations)
- sweat profusely
- feel numb around lips and fingers
- change in behaviour- angry, quiet, confused, crying
- become unconsciousness or have a seizure

HYPERGLYCAEMIA –(HYPER)

If caused by high blood sugar, the child may:

- feel excessively thirsty
- have a frequent need to urinate
- feel tired or lethargic
- feel sick
- be irritable
- complain of blurred vision
- lack concentration
- have hot dry skin, a rapid pulse, drowsiness
- have the smell of acetone (like nail polish remover) on the breath
- become unconsciousness

If a child suffers from a diabetic emergency the Service and staff will:

- Always provide adult supervision
- Follow the child's diabetic medical management /action plan
- If the child does not respond to steps within the diabetic medical management/action plan, immediately dial 000 for an ambulance
- Continue first aid measures and follow instructions provided by emergency services
- Contact the parent/guardian when practicable
- Contact the emergency contact if the parents or guardians can't be contacted when practicable
- Notify the regulatory authority within 24 hours

REPORTING PROCEDURES

Any incident involving serious illness of a child which requires urgent medical attention or hospitalisation is regarded as a serious incident. The following is required:

- staff members involved in the situation are to complete an *Incident, Injury, Trauma Record* which will be countersigned by the Nominated Supervisor of the Service at the time of the incident
- ensure the parent or guardian signs the *Incident, Injury, Trauma Record*
- if necessary, a copy of the completed form will be sent to the insurance company
- a copy of the *Incident, Injury, Trauma Record* will be placed in the child's file
- the Nominated Supervisor will inform the Service management about the incident
- the Nominated Supervisor or the Approved Provider will inform the Regulatory Authority of the incident within 24 hours as per regulations
- staff will be debriefed after each incident and the child's individual medical management plan and risk minimisation plan evaluated, including a discussion of the effectiveness of the procedure used
